IDENTIFIERS *Arkansas

ABSTRACT

This document reports data on full-time equivalent (FTE) enrollment and student semester credit hour (SSCH) production in Arkansas' state higher education institutions for 1987-88 in 7 figures and 29 tables. Data on FTE enrollment show it rose 2 percent over the previous year, the second consecutive increase in FTE enrollment with most of the change occurring at the undergraduate level. Trends in SSCH production at state universities over 5 years show increases in communication, education, foreign languages, basic skills, and protective services. At public two-year institutions SSCH production has increased in social sciences and visual and performing arts. A section on SSCH offers tables showing production by discipline from 1983-84 through 1987-88, by occupational codes and programs, and by public 2-year institutions' production by discipline for 1987-88 and for 1985-87 through 1987-88. The report also includes data briefs analyzing trends in basic skills or remedial education. State legislators have mandated testing, standards, and remedial education programs. There are also data briefs on education, engineering, and foreign languages. Appendices provide institutional SSCH production tables and institutional names and abbreviations. (JB)

ANNUAL FULL-TIME EQUIVALENT ENROLLMENT AND
STUDENT SEMESTER CREDIT HOUR PRODUCTION
IN ARKANSAS STATE INSTITUTIONS OF HIGHER EDUCATION

ANNUAL FULL-TIME EQUIVALENT ENROLLMENT AND
STUDENT SEMESTER CREDIT HOUR PRODUCTION
IN ARKANSAS STATE INSTITUTIONS OF HIGHER EDUCATION, 1987-88

Full-Time Equivalent Enrollment

Full-time equivalent (FTE) enrollment for 1987-88 at the state's public colleges and universities rose 2.0% over the previous year, the second consecutive increase in FTE enrollment. The 57,556 total FTE is over a thousand FTE students higher than the total for 1986-87. This positive change occurred at the undergraduate level, with undergraduate FTE rising by 2.6%.

The academic year of 1987-88 brought an increase of 608 FTE at the public four-year universities, a change of 1.3%. As indicated by Table 1, this represents the largest four-year institution FTE enrollment in five years. At the public two-year institutions, FTE rose by 524, or 6.2% over last year. This, too, is a five-year peak in FTE enrollment. Tables 1 and 2 display FTE enrollment since 1983-84 for each public institution and Table 3 provides a grand total; FTE is derived from the student semester credit hours (SSCH) reported in Tables 4 through 6. Figure 1 illustrates SSCH production by level of study for the state's public institutions of higher education in 1987-88.

SSCH Production By Discipline

Over the past five years, there have been some interesting changes in SSCH production. For example, at the state universities, SSCH generation has increased in Communications (09), Education (13), Foreign Languages (16), Basic Skills (32), and Protective Services (43). Decreases in SSCH occurred in Agribusiness and Agricultural Production (01), Agricultural Sciences (02), Architecture and Environmental Design (04), Computer and Information Science (11), and Engineering (14). Table 7 provides details of these changes.

At the public two-year institutions, SSCH as a percentage of total production has increased in Social Sciences (45) and Visual and Performing Arts (50). There has been a continuous decline in Marketing and Distribution (08) and Mechanics and Repairers (47). See Table 8 for data on the past five years.

Table 9 lists the ten programs with the largest SSCH production since 1983-84. Analyses of SSCH production in selected disciplines follow Table 9.

SSCH IN OCCUPATIONAL CODES

SSCH IN OCCUPATIONAL CODES

ADHE and the Arkansas Division of Vocational and Technical Education have designated lower level SSCH in the following twelve 2-digit CIP codes and one specific 4-digit category as occupational:

07	Business and Office
08	Marketing and Distribution
10	Communication Technologies
12	Consumer, Personal, and Miscellaneous Services
15	Engineering and Engineering-related Technologies
17	Allied Health
18.11	Nursing
20	Vocational Home Economics
41	Science Technologies
43	Protective Services
46	Constructive Trades
47	Mechanics and Repairers
48	Precision Production

At the four-year institutions, occupational SSCH has experienced an upturn after declining from 1984-85 to 1986-87. Increased enrollment in Engineering-related Technology and Allied Health substantially accounted for the rise in SSCH production in occupational programs in 1987-88. However, as a percentage of total lower level SSCH, occupational programs continue to be below 5% at state universities. See Table 11 for four-year institutional totals and Table 12 for a summary of occupational SSCH production since 1985-86.

At the two-year institutions, the same codes have ranked as the first five producers for the past four years:

#1	07	Business and Office
#2	18.11	Nursing
#3	08	Marketing and Distribution
#4	15	Engineering and Engineering-Related Technologies
#5	48	Precision Production

Occupational programs as a percentage of total SSCH at the state two-year colleges have declined 5.4% since 1984-85. At the same time, the actual number of SSCH in these programs has risen by 1,930 during the same time period. Viewed in the context of an increase in total SSCH at the two-year institutions over the last three years, this trend suggests that more students are enrolling in transfer programs. See Table 10 for two-year institutional totals.

DATA BRIEFS IN SELECTED DISCIPLINES

SSCH IN BASIC SKILLS

In the 1987 regular session of the General Assembly, legislation was passed to require that all first-time freshmen admitted to enroll at any Arkansas public college or university be tested to determine the need for remediation before enrollment in college-level math and English courses. Act 1052 directed the State Board of Higher Education (SBHE) to establish the procedures, tests and minimum scores needed to implement this law. At a November 13, 1987, special meeting, the State Board adopted freshman placement standards, after obtaining detailed information from each institution about present and projected SSCH in remedial education and cost estimates to implement the placement standards.

Implementation of the freshman placement standards in mathematics, English composition and reading took place in Fall 1988. Data from the 1988-89 academic year are not yet available to include in this publication for comparison purposes. The most recent data is from 1987-88. It is evident that even without the standards remedial education programs have been increasing at the state's public institutions of higher education, but because these programs have been based on different standards and reporting methods, the basic skills SSCH for 1988-89 should provide comparable data for all institutions.

TABLE 13. BASIC SKILLS SSCH, 1985-86 THROUGH 1987-88

	1985-86	1986-87	1987-88
MATHEMATICS			
- Two-year Total	6,358	8,814	12,222
- Four-year Total	9,132	12,753	17,762
- TOTAL	15,490	21,567	29,984
ENGLISH COMPOSITION			
- Two-year Total	4,694	5,101	6,004
- Four-year Total	9,211	9,087	7,973
- TOTAL	13,905	14,188	13,977
READING			
- Two-year Total	4,241	4,925	5,616
- Four-year Total	6,987	7,244	7,090
- TOTAL	11,228	12,169	12,706
GRAND TOTAL	40,623	47,924	56,667

The sharpest increase since 1985-86 has occurred in mathematics, where total remedial SSCH grew from 15,490 credit hours to 29,984 hours in 1987-88. This surge represents a 94% gain over two years with the public four-year institutions accounting for the largest increase.

Despite a slight dip from the previous year, English composition remedial SSCH in 1987-88 was up slightly from 1985-86. At the public two-year institutions, remedial English SSCH continued to climb, while the four-year institutions experienced a noticeable decline.

In the area of reading, remedial SSCH rose 13.4% over the past two years. As the data show, remedial reading SSCH at the two-year institutions has grown over 30%, while there was only minor growth at the four-year institutions.

Overall, total remedial SSCH in math, English composition and reading is up nearly 40% in two years. It is anticipated that there will be further increases once the freshman placement standards are reflected in the 1988-89 data. As shown by these remedial SSCH figures, many students enter college unprepared for college-level work; it is hoped that the freshman placement standards will have a salutary effect.

SSCH IN EDUCATION

For the sixth consecutive year, undergraduate education SSCH has held between 150,000 and 159,000. The SSCH generated at the undergraduate level has experienced a slight upturn for the last three years after declining by 16% from 1980-81 to 1984-85. Since 1982-83, undergraduate education SSCH as a percentage of the total SSCH generated, has constantly stayed between 11.0 and 11.5% at the state four-year institutions, while the two-year public colleges have remained between 4.3 and 4.9%. Overall, undergraduate education SSCH generated the second largest total SSCH in 1987-88.

As a percentage of total graduate SSCH, graduate education SSCH has risen over the past three years and continues to be the largest graduate discipline in Arkansas public higher education, even though the actual number of SSCH has shown a small decline from 1985-86 to 1987-88. In 1985-86, state universities generated 42,484 graduate education SSCH, which represented 37% of the total* graduate SSCH. By 1987-88, graduate education SSCH slipped to 41,342 but still accounted for 37.6% of the total graduate education SSCH. This is primarily due to a 3% decrease in graduate enrollment over the last three years.

* Total graduate SSCH, for these purposes, excludes graduate SSCH at UAMS.

DISC87_1.WS

SSCH IN ENGINEERING

For the first time in the past ten years, there has been a slight decline in the number of engineering baccalaureate degrees granted nationally. The most recent data available from the National Center for Education Statistics (NCES) shows that in 1984-85, the number of bachelor's degrees in engineering reached a record high of 77,154, while in 1975-76 there were only 38,388 degrees awarded. However, in 1985-86 the nation's colleges and universities conferred 76,333 undergraduate degrees, representing a 1% decline from the previous year.

Conversely, Arkansas experienced only limited growth in engineering degrees during the late 1970s and early 80s. The peak year was 1983-84 when 359 degrees were granted. Since then, there has been a constant decrease, to 271 undergraduate degrees in 1987-88. This drop constitutes a 25% reduction in four years, a sharp contrast to the national data.

TABLE 16. ENGINEERING SSCH, 1984-85 THROUGH 1987-88

	1984-85	1985-86	1986-87	1987-88
State Four-Year				
Lower	11,256	11,708	12,213	11,417
Upper	21,893	20,495	18,840	19,203
Grad.	3,582	3,535	3,588	3,207
SUB-TOTAL	36,731	35,738	34,641	33,827
State Two-Year				
Lower	370	326	325	604
TOTAL	37,101	36,064	34,966	34,431

Corresponding to the state's declining number of degrees granted, engineering SSCH in Arkansas has also diminished since 1984-85. As seen in the above table, total engineering SSCH has fallen over 7% in three years. Although upper level SSCH rebounded slightly, all three categories of engineering SSCH decreased in the four-year institutions. Of the three, upper level SSCH actually declined the most, falling 12% in three years. Such is not the case for the two-year institutions where there has been a 63% increase during the same period.

Along with the national drop in bachelor's degrees, NCES reports that undergraduate engineering enrollment in four-year institutions has also decreased by 5.4% from 1984 to 1986. The question remains as to whether this recent data signals a long-term trend, with U.S. engineering programs entering a period of decline due to falling enrollment and degrees awarded. If so, then both the shrinking SSCH and declining number of degrees experienced by Arkansas' schools are entirely consistent with the national pattern.

SSCH IN FOREIGN LANGUAGES

Along with the rest of the country, Arkansas has become more acutely aware of the interdependence that exists among state, national and international economies. More than ever, the quality of life and the standard of living the populace can expect to enjoy is tied to fluctuations in the world marketplace. Having to cope with this economic reality has required learning about other cultures and the ways they conduct business.

Essential to understanding the habits and manners of other countries is exposure to their language and culture. This section comments on recent trends in foreign language study by students at Arkansas public colleges and universities. The conclusion is that our students have slightly increased their study of foreign language in recent years.

TABLE 17. SSCH IN FOREIGN LANGUAGES FOR PUBLIC FOUR- AND TWO-YEAR INSTITUTIONS, 1984-85 THROUGH 1987-88

	1984-85	1985-86	1986-87	1987-88
State Four-Year				
Lower	17,667	19,352	19,396	19,536
Upper	1,919	2,439	2,244	2,501
Grad.	710	589	803	1,024
SUB-TOTAL	20,296	22,380	22,443	23,061
State Two-Year				
Lower	796	942	867	966
TOTAL	21,092	23,322	23,310	24,027

As the table indicates, student semester credit hours in foreign languages have continued to increase steadily. Although there was a small drop in 1986-87, total SSCH rose by 13.9% in three years. Moreover, there were sizable gains in all three levels of SSCH at the four-year institutions over what it had been in 1984-85. Graduate level SSCH grew nearly 45% in the same period. Likewise, there were increases in lower and upper level SSCH. For the two-year institutions the experience was similar. Community college SSCH increased over 21%.

While the National Center for Education Statistics does not supply comparable SSCH data, it does report the number of baccalaureate degrees granted nationwide in foreign languages. From 1975-76 to 1985-86, the most recent year for which data are available, the number of bachelor's degrees in foreign languages conferred by institutions of higher education declined almost 35%. However, the number of undergraduate degrees increased by 6.5% between 1983-84 and 1985-86 which might suggest the beginning of a turnaround. Statewide, Arkansas public institutions of higher education awarded 20 degrees in 1986-87, down nearly 46% from 1977-78 when 37 degrees were granted.

By examining the Arkansas data for degrees granted and SSCH, it can be determined that most foreign language courses are taken by non-majors to meet general degree requirements. This conclusion was verified by surveying the catalogs of the four-year institutions; many list foreign language as a degree requirement.
